Let's watch some underwater scenes on youtube….

Activity Five – Let's learn more about Surfing

Surfing is one of the oldest practiced recreational activities in the world. The act of riding waves with a wooden board originated in Western Polynesia over three thousand years ago. The first surfers were fishermen who found that riding waves was an excellent method of getting their catch to shore. In the early 20th centruy surfing spread to the USA and Australia but it was in the 1950's and 1960's when cheaper, lighter boards made of fiberglass and foam arrived that people headed to the beach. The sport has spread to all locations where waves are of sufficient size. The modern day surfers are forever seeking the "perfect" wave.

Let's watch some surfing on Youtube..

Activity Six – Why is water wet and where does it come from….

http://www.kidzone.ws/water/index.html
